Career Objective

Seeking a challenging Software Engineering role to leverage skills in Java, Python, and web technologies. Eager to contribute to innovative projects, utilizing a strong foundation in data structures, algorithms, and a passion for full-stack development and AI applications.

Skills

Programming Language <i>Java, Python</i>	Database <i>MySQL</i>
Web <i>HTML, CSS</i>	Framework <i>Springboot, React.js</i>
Core concepts <i>Data Structures and Algorithms, OOPs</i>	Tool <i>Git, GitHub, VScode, MetaMask</i>

Projects

CodeRAG-AI based code retrieval system

Developed AI-powered code retrieval and query system
Implemented semantic search for relevant code snippets
Integrated OpenAI API for intelligent code responses
Designed responsive UI with real-time chat interface
Tech: React, TypeScript, OpenAI API, Tailwind CSS, Bun

Truth Guard-AI Fake News Detector

Developed ML model to classify fake news
Applied text preprocessing and feature extraction
Built simple web interface for real-time prediction
Tech: Python, NLP, Scikit-learn

calm companion-AI-Powered Mental Health Chat Assistant

Created chatbot for mental health support
Integrated sentiment analysis for adaptive replies
Designed secure backend for conversations
Tech: Python, Flask, OpenAI API

FundDAO-Crowdfunding platform

Built decentralized crowdfunding platform
Implemented smart contracts for transparency
Integrated MetaMask for secure transactions
Enabled DAO-based voting and fund management
Tech: Solidity, React, Web3, MetaMask

Professional Experience

Internship - Blue IT solutions

Java application development internship
• Collaborated with senior developers to debug and resolve software defects, enhancing application performance.

Virtual Internship - Infosys Springboard

Java Based Digital Banking Fraud Detection & Simulation Engine
• Contributed to the documentation of technical specifications and user guides for the digital banking platform.

Education

HSC - Bharathi Vidhyalaya Matric HR Sec School Score: 88%	2022 — 2023
Bachelor of Engineering in Computer Science and Engineering - VSB Engineering College Karur Score: 80%	2023 — 3027

Certifications

Software Testing - NPTEL

Proficient in software testing methodologies, including test case design, execution, and defect tracking.

Java developer certification - Infosys Springboard

Proficient in Java programming fundamentals, object-oriented principles, and data structures.

Introduction to IoT and Digital Transformation - Nasscom Futureskills prime

Fundamentals of IoT architectures, data analytics, and digital transformation strategies acquired.
